Criteria and weighting	Level	Comments
Application of knowledge and under-standing (20%)	Satisfactory	The application of knowledge to the content of the e-portfolio is satisfactory overall. There are some artifacts applied that reflect knowledge of the topic, but the scope that could have been applied could have been more extensive. Overall then, a satisfactory outcome here.
Collaboration/ independent working (20%)	Satisfactory	There is some evidence of collaboration and also some acknowledgement of tutor feedback and how this can support study moving forward. Overall, a satisfactory outcome.
Criticality (40%)	Very Good	There are some areas of very good emerging criticality in your content, but this needs to be consistent. It may be an issue of time management, but do try to put quality time to one side to develop your academic outcomes/summative as with more time applied and invested you would see a more holistic consistent outcome overall regarding your summative. You do reflect some real world scenarios and discussions in your topic which is appropriate to this level of study.
Structure and Presentation (as detailed in the assessment guidance) (10%)	**Very Good**	The presentation of the e-portfolio for the module is completed to a very good standard. The content is easy to navigate, and it is clear how to access all areas that have been applied for the final summative e-portfolio upload.
Academic integrity (10%)	Satisfactory	When engaging in your primary research for your dissertation module, then thoroughly check the ethical requirements regarding what needs to be evidenced prior to you interviewing participants, and then do be prepared to have that paperwork regarding signed ethical clearance for participants in your actual dissertation submission, if this is the route you intend to take. Ethical clearance may have different boundaries in different geographical locations, but when completing the dissertation abide closely by what your supervisor is asking you to do and reflect all ethical clearance

Feedback for RRMP E-portfolio Summative

		guidelines in the context of whatever direction your study takes.
Overall		

Positives:
- Overall very good criticality
- Very good structure and presentation regarding the e-portfolio
- Overall a satisfactory outcome

Points for development:
- Possibly apply more time management overall when completing an academic module
- Engage in deeper research to develop the breadth of your academic knowledge
- If gathering primary research for your dissertation work closely with your supervisor to ensure all ethical clearance is appropriately completed
